Project Ref: ENF-CAN-35 **Date: 04/10/2026**

Thank you for inviting Enforce Electrical, Fire & Security to prepare this design proposal. This quotation is based on information provided to us by Canpack In relation to cable length and size.

We have made no allocation for access equipment or scaffolding in this quote.

Materials supplied

160m 70mm 4core SWA

2x Glands for cable

1x metal and plastic cable ties as required

2x 3m sections of cable ladder

1x supports for new ladder as required (cantilever arms/ Unistrut)

Labor

1x cable gang team to pull and secure cable along route and terminate at switch gear end.

ASSUMPTIONS/EXCLUSIONS

- Work would all be carried out with free and uninterrupted access to our work area made available to us at all times
- All access equipment that would be required for the installation works would be made available to us, free of charge.
- All access arrangements for the cable pits will be provided and maintained by others, including gas monitors and rescue equipment.
- Any waste materials would be placed into a skip provided free of charge by you and sited local to the work area
- All free issue materials would be available when requested and require no modification for their installation.
- Cables would all be installed onto existing established routes and dressed with free issue tie-raps.
- All cable ducts and pits will be clear of any obstruction and contain a draw wire.
- Cable numbers (supplied by the client) will be fitted to each end of the cables, any additional numbering required would be charged for.
- Cable cards would be issued by the client and routes clearly identified before pulling commenced.
- Any coiled cable would be charged for at the PPM for pulling through ducts. If we have to return to the cable to dress this will be carried out on day work.
- Any cleats to be fitted would be at a cost of £4.00 per cleat.
- Any standing time will be charged for at the following rates
- Cable Installation Supervisor £47.65ph

PROJECT Value **£ 16598 + VAT**
